

PREMERA®

Maximizing the value with Premera

No Grinding, No Profiling, No Dust with Premera Sol Gels FP1 Fusion Primer.

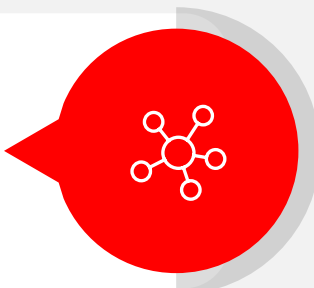

Existing Crews Double Job Completion Rate.

Discover Premera Sol Gels Primers & Coatings.

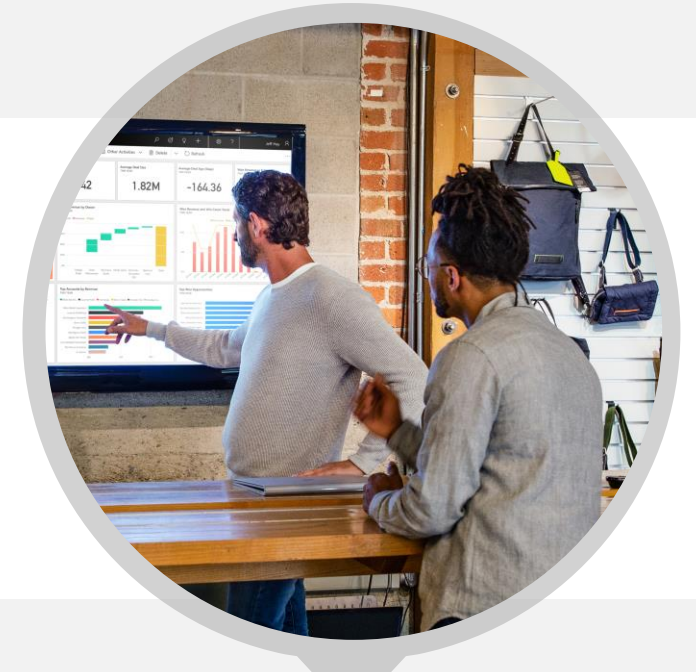

FP1 Fusion Primer creates a molecular bridge between a coating and substrate.

No grinding or surface profile is needed to achieve a strong chemical bond to surface.

Premera brings value to businesses through multiple customer touchpoints:

When an organization uses Premera in a strategic way, stronger customer relationships drive competitive advantage and business growth. But how do you get there?

Premera Quick Seal is a single component, spray down, **2-minute full cure** acrylic sealer designed to seal substrate pores and capillaries before applying Premera T2 MCM. Sealing new or ground concrete with Premera Quick Seal will double or triple the coverage of Premera T2 MCM.

To use **Premera Quick Seal** as a fast stain and seal, 1-2 oz of Ameripolish Acetone Based Surelock Dye can be added directly to 1 gallon of Quick Seal. Topcoat Premera Quick Seal with Premera T2 MCM for high performance chemical and abrasion resistant floors.

Premera T2 MCM is a single component, spray down sol-gel based clear coating designed to protect concrete, terrazzo, tile, and existing coatings by creating a high strength, quartz mineral barrier.

Premera T2 MCM chemically fuses with substrates and does not require a substrate profile. Premera T2 MCM can also be used as a high-performance **topcoat for bare metal** and painted metal surfaces.

***Walk away without back rolling**

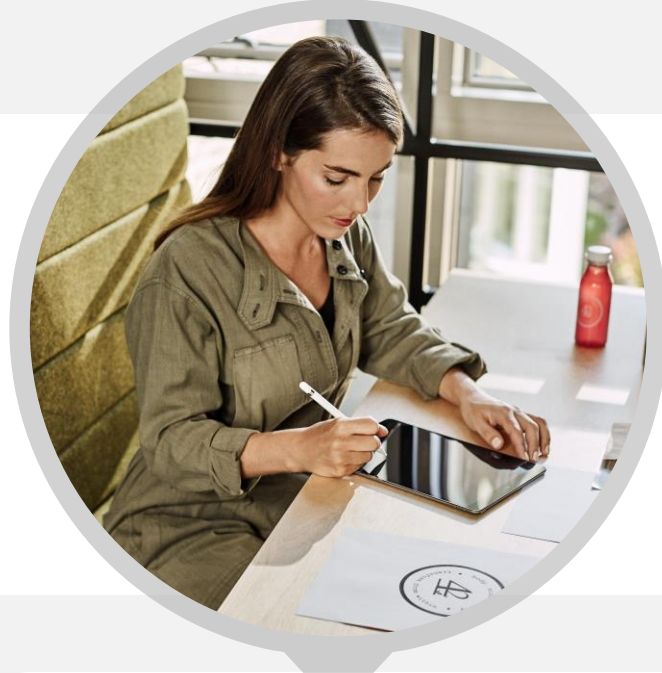

Premera T9 VFC is a single component, spray down, sol-gel based clear liquid quartz coating that creates a thin durable layer of quartz.

Premera T9 VFC removes the need to keep stripping and waxing floors. Provides excellent **abrasion and chemical resistance**.

***Significantly lowers maintenance costs**

Customers want to eliminate the need for continuous harsh chemical cleaning:

Maximizing the value of Premera is about unifying businesses and ecosystems across the customers journey, uncovering insights and optimization throughout. Offering unparalleled protection, anti-microbial options, custom matted finishes, non-skid walking surfaces are what customers are now looking for, with a quick application time frame to work with.

Premera Anti-Microbial Agent is the first of its kind to incorporate silver into a sol-gel coating to aid in the cleanliness against odor-causing bacteria and mold on virtually any surface.

*** Premera Sol Gels Anti-Microbial Presentation**

Premera Anti-Microbial Agent: designed for Premera T2 MCM and Premera T9 VFC.

Premera T2 MCM or Premera T9VFC with ANTI-MICROBIAL AGENT maximizes the efficiency of silver by encapsulating the silver in the coating to protect them and keep them at the surface of the treated area where it can be most effective. MRSA (Staph) 99.4% Reduction in 4 Hours Norovirus* 92.5% Reduction in 4 Hours E.coli 99.9% Reduction in 4 Hours Salmonella 99.9% Reduction in 4 Hours Bacterial Surface Degradation that works 24/7 inhibit Mold, Mildew, and Fungal Growth Prevent Stains caused by Mold Destroy Foul and Offensive Odors.

*Approved Surrogate Tested: Feline Calici Virus **EPA Registered Potable Water Contact Safe

Premera Matting Agent A mix the entire bag of matting agent with 1 gallon, 1:1 ratio, of Premera T2 MCM or Premera T9 VFC for a matte finish. Mix 1/2 bag with 1 gallon, 1/2 bag:1 ratio, for a satin finish for Premera T2 MCM or T9 VFC.

Premera Matting Agent: Pump-spray application is recommended for a smooth and successful finish.

***Non-carcinogenic**

Premera Anti-Skid (Pozzotive 55)

Mix 1/3 – 1/2 bag of Anti-Skid with 1 gallon of Premera T2 MCM or Premera T9 VFC. We highly recommend the use of Premera Anti-Skid with Premera T2 MCM in Commercial Kitchens over concrete, tile, epoxy, or flaked floors.

Premera Anti-Skid (Pozzotive 55)

Pour mixed product into metal paint tray, roller application is required.

***Made from recycled glass**

“**PREMERA®** Products, Data, and Customer Support is everything. We are committed to providing the best customer and technical support for all our clients, you may contact us 24/7.”

We will be launching more Premera products soon!
