

# Managing your hybrid work scenarios

## Experience easy onboarding with a Windows 365 Cloud PC and Microsoft Endpoint Manager

Brigette is a new remote contractor. She needs access to client resources for her time-based project.

IT admin enables Brigette to use her own device for the client project. Brigette gets an email with instructions to access Windows 365.

On Day 1 she has access to project apps and content that are securely located in the cloud.

Once the project is over, her access to Windows 365 Cloud PC can be remotely turned off with Microsoft Endpoint Manager.

## Reach your individual and team goals with built-in assistance features in Windows 11

### Experience simple, modern visuals

Focus on what matters with an improved yet familiar Windows user experience, and instantly get to work.

### Stay organized with snap assist

Easily pick up where you left off. Snap assist optimizes screen space and remembers layouts even after you dock and undock.

### Use inclusive video conferencing

Turn your microphone on and off from the taskbar so everyone is heard. Keep the background in the background with intelligent noise cancelling and blur.

### Share a window while in a meeting

Easily share any open window from your taskbar during a call or in a hybrid meeting.

### Focus on what's important, automate the rest

Automate redundant and manual tasks from your desktop or web browser with Power Automate for desktop.

### Work seamlessly with Microsoft 365 apps

From the OS to the apps that run on it, everything works together.

## Deploy & protect endpoints for hybrid and remote work

Windows 11 was built to help employees and teams focus on what is important: getting the job done and efficiently communicate and collaborate. It delivers the security and management needed for hybrid work.

Unified management and security

Ensure secure, high-performance access with Microsoft Tunnel VPN and Microsoft Defender.

Transform remote computing with Windows 365 and Azure Virtual Desktop.

Cross-platform support from Windows to iOS, and more.

Streamline deployments with zero-touch provisioning.

Secure devices and built-in app protection.
