

# Hybrid Meetings Teams powered by Microsoft 365

Present with confidence when  
you look and sound great

Identify and differentiate the voices of  
**up to 10 people talking**

in a Microsoft Teams Room\*

Enables those not in the room to  
**know who is talking**  
at any given moment

## Foster team connection with live reactions

Engage beyond video with experiences that make you feel like  
you're there, even when you're not.

Increase understanding & engagement with  
**live captions**

Enable attendees to  
**"raise hand"**  
without interrupting the speaker

Focus on what matters by  
**pinning video  
and content**

Use your phone or tablet as a  
**companion device**  
to enhance meeting experiences

## Latest announcements on innovations coming to Teams\*

Inclusive hybrid meetings with  
Intelligent Camera + Dynamic View

### AI-powered active speaker tracking

enabling in-room cameras to use audio, facial movements, and gestures  
to detect who in the room is speaking, zooming in for a closer perspective

### Multiple video streams

that allow in-room participants to be placed in their own video panel

### People recognition

which will identify and display the profile name of enrolled users within  
their video panel

## Cost saving and benefits of hybrid meetings

Time reduction required to start  
meeting with Microsoft Teams  
Room Managed Services<sup>1</sup>

Pre-meeting and post-meeting  
time saved with Surface Hub<sup>2</sup>

Reduction in necessary office  
space spend<sup>3</sup>

Saved per employee per year with  
increased productivity due to the  
collaboration features in Teams<sup>4</sup>
