

Change the game with outcome-driven finance

Reimagine finance with AI and automation functionality that redefines transactional finance and empowers data and outcome-driven finance

Monitor financial operations in real-time, predict outcomes and make data-driven decisions to drive business agility and growth

85% of CEOs report that their CFO's ability to analyze data and produce meaningful insights was key to profit growth.¹

Cashflow forecasting

Create more accurate forecasts
Enable you to improve future cash flow projections by leveraging AI, unified data, and "what if" analyses to develop highly accurate forecasts.

Budget proposals

Streamline the budgeting process
Simplify the budgeting process by utilizing historical data, trends, forecasts, and "what if" scenarios to generate budget predictions.

Customer payment predictions

Improve cash flow
Leverage AI to increase on-time payments by predicting which payments may be late and proactively automating follow-up to at-risk customers.

Dynamics 365 Finance has given us a platform for better data quality and given us a platform for standardizing and reimagining our accounting processes.

Director of finance operations, consulting

Quantified benefits for the composite organization include:

-  Finance personnel productivity improvements by up to **55%**.²
