

Proactively navigate emerging risks and market volatility

The speed of business is accelerating, and adaptability is the new competitive differentiator

Geopolitical tensions and conflicts are creating **unpredictability in international trade policies** and agreements, with regulators and government groups posing the greatest **compliance challenges** since 2019 and they are expected to continue to do so through 2023.¹

Trust in a solution that helps maintain compliance, secures data, and delivers a 99% uptime service level agreement.²

Decrease global financial complexity and risk

Quickly adapt to changing regulatory requirements.

Take advantage of a guided, rules-based chart of accounts and no-code/low-code globalization services to simplify tax determination and calculation, electronic invoicing, regulatory reporting, business documents, and global payments.

Meet local and global business needs to scale faster.

Accelerate global expansion and ensure compliance with out-of-the-box localizations for 44 countries/regions and 52 languages. Extend capabilities with over 50 partner localization solutions from Microsoft AppSource.

Minimize your need for customizations.

Create configurable business documents with Microsoft 365 templates. Easily adapt to changing business and legal requirements without the need for expensive, time-consuming and rigid code changes.

Accelerate invoice delivery.

Go paperless, speed processes, and improve traceability with a no-code, configurable electronic invoice document submission and exchange with flexible formats and automation workflows for business to government, and business to business.

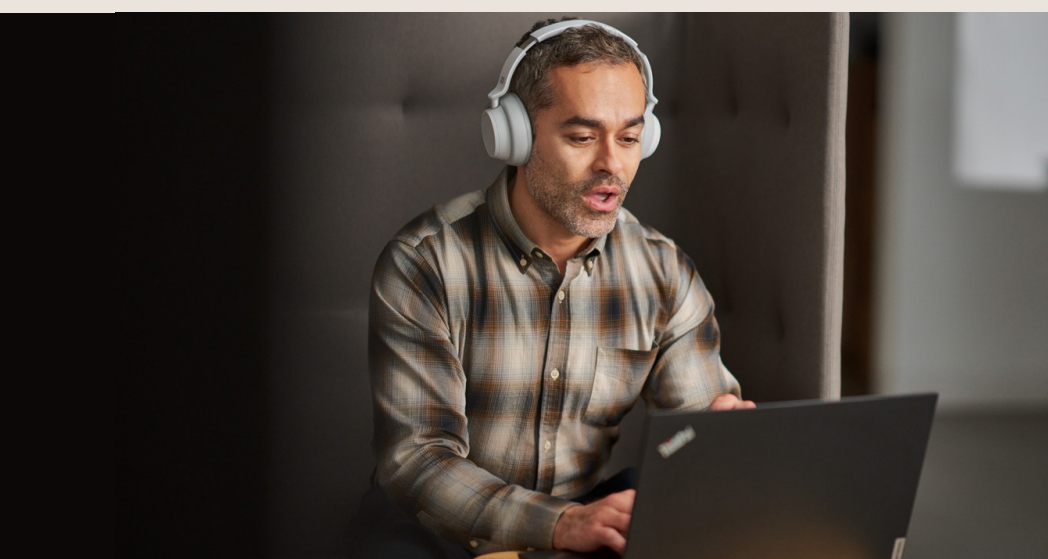

Comply with local tax regulations.

Use a no-code, flexible tax-determination matrix and configurable tax-calculation formula designer to comply with local tax regulations and support complex tax scenarios.

Confidently move to the cloud to optimize digital business processes and unlock the insights needed to adapt faster, work smarter, and perform better.

More than nine in ten respondents (93%) agree or strongly agree that new technologies such as artificial intelligence and cloud **make compliance easier** by automating human tasks, removing human error and making the process more effective and efficient.

Let us show you how Dynamics 365 can help you optimize financial and operating models to create a resilient organization that thrives even in the face of impending disruption.
