

Azure is the best place for data

“

By moving our aquired applications to Azure, we were able to get them up, running, and adding value to the business in three weeks versus the three months needed to requisition servers and storage.

”

Peter Tomlinson
Director of IS, Technology Operations

Migrate efficiently & on your own terms with Azure

Scale your workloads and applications on demand

Increase agility with best-in-class Azure infrastructure that scales to your business needs. Reduce operational burden with fully managed application and database services in Azure.

Optimize costs and migrate with confidence

Save money with the most cost-effective offers for Windows Server and SQL Server. Confidently migrate your workloads to Azure with best practices, expert guidance, and cost optimization tools.

Stay secure and resilient across hybrid environments

Protect workloads across your hybrid environments with intelligent security services backed by 3,500 cybersecurity professionals. Use built-in resiliency to avoid costly business interruptions.

Azure SQL

Infrastructure-as-a-Service

SQL Server on Azure Virtual Machines

Best for life and shift and/or workloads requiring OS-level access

Platform-as-a-Service

SQL Server on Azure Virtual Machines

Best for modernizing existing apps

SQL Server on Azure Virtual Machines

Best for supporting modern cloud

Edge Computing

SQL Server on Azure Virtual Machines

Best for extending apps to IoT edge

Operate hybrid seamlessly with fully-managed data services, integrated backup & disaster recovery

25+ years innovation

Secure cloud foundation

Save up to 93% vs AWS¹

Cloud on your terms

Up to 5x faster vs other clouds¹
